Get Clean, Power It Green! Energize Our Campus, Energize Our Community

For only \$15, you can contribute to a cleaner, more sustainable world for today and tomorrow.

Your purchase will support renewable energy installations that supply New England with clean and healthy electricity, making our energy supply safer and more secure. Through Clean Energy Choice-On Campus, a program of the Massachusetts Technology Collaborative (MTC), you have the power to:

- **Go Green!**: Make the choice to grow the clean energy supply of our school and community.
- **Minimize Your Impact**: Reduce our reliance on greenhouse gas-emitting fossil fuels that contribute to global warming.
- **Strengthen The Community**: Support job growth in the Commonwealth's clean energy economy.

For every dollar you pay to a Clean Energy Choice-On Campus supplier to support new renewable energy sources, MTC will match it with two dollars to support clean, renewable energy projects:

- 1/3 of the match goes directly to Tufts to invest projects on campus.
- 1/3 of the match goes to Tufts' host city or town (Medford) to invest in projects in the community.
- 1/3 goes to projects that benefit Massachusetts' low-income residents.

Tufts University is the FIRST university to participate in Clean Energy Choice®-On Campus program!
